

## Growing Power Africa Initiative

mar, 09/29/2009 - 23:43 -- Cecelia Tanaka

### Langue

Undefined

The Growing Power Africa Initiative will strengthen food security for school children and their care givers in South Africa and Zimbabwe. The program involves building a new model of local food systems to ensure adequate nutrition in the short-term and build a long-term foundation for competitive African human capital in the global market place.

Growing Power transforms communities by supporting people from diverse backgrounds and the environments in which they live through the development of Community Food Systems. These systems provide high-quality, safe, healthy, affordable food for all residents in the community. Growing Power develops Community Food Centers, as a key component of Community Food Systems, through training, active demonstration, outreach, and technical assistance.
