Project Summary

Elevator Pitch

Concise Summary: Help us pitch this solution! Provide an explanation within 3-4 short sentences.

Impaired people are seen as individuals who need health care, special treatment, assistance and social services all along. Therefore they have uneven relationships where they are recipient of resources and never resources for the community and for the world where they live. This project would create a new working context through the home jam production and sale (from the earth to the consumer) with special educational attention and employment of disabled persons (cognitive and physical impairment). The scope is building a working context as health care to improve the vulnerable populations' well-being and avoid growing either of physical disability or social exclusion.
Do we believe to enhance as important resource who is usually considered as a limit.
