Computerization of Hospital Management System3.pdf

About You

Your idea
Year initiative/program began:
2004

Field of work
Health

If Field of Work is "Other" please define in 1-2 words below (and explain in detail in the entry form):
Service / Activity focus (If "other" please explain in entry form)
Technology

Year organization founded (yyyy)
2007

YouTube Upload
Project URL

Positioning of your initiative on the Mosaic of Solutions™ diagram:

Which of these barriers is the primary focus of your work?
Social benefit businesses not deemed investment worthy

Which of the principles is the primary focus of your work?
Shorten timeline on individual "returns"

If you believe some other barrier or principle should be included in the mosaic, please describe it and how it would affect the positioning of your initiative in the mosaic
Lack of initiative to implement the idea at Government Level of Computerisation of Hospital Management System.

Innovation

What is your signature innovation, your new idea, in one sentence?
Computerization of Hospital Management System.

Describe what makes your idea unique—different from all others in the field.

In our Country people are in a dark about the status of the Hospitals and Nursing Homes. They go door to door of the Hospitals/Nursing Homes and knock them wasting their valuable time, energy and money and getting disappointed
ultimately. To get rid of these situations, if there is any system of Computerization so that people can search through Internet the status of the Hospitals, the vacancy positions, the cost factor, the facilities reports etc. people will not be harassed unnecessarily.

**How do you implement your innovation and apply it to the challenge/problem you are addressing?**

If there is any system of Computerization so that people can search through Internet the status of the Hospitals, the vacancy positions, the cost factor, the facilities reports etc. people will not be harassed unnecessarily.

**Do you have any existing partnerships, and if so, how did you create them?**

No.

**In which sector do these partners work? (Check all that apply)**

Citizen sector (nonprofits, NGOs).

---

**Impact**

**Provide one sentence describing your impact/intended impact.**

Patient party will start their journey with the happy report within their budget to save the patient’s life before it is emergency.

**Please list any other measures of the impact of your innovation.**

Through the Computerization of Hospital Management System, all the Hospitals and Medical Colleges of a state/ province can be able to communicate with each other through Networking. If implemented, as an outcome of this, all the people of a state can come to know the latest status of any Hospital and the particular details of that Hospital so that anyone can decide through a Common URL (Uniform Resource Locator) of Internet to which Hospital of the state the patient can be admitted and what kind of treatment the patient will receive at that Hospital.

**Does your innovation address and/or change banking regulations?**

No

**How many people does your innovation serve or plan to serve? Exactly who will benefit from your innovation?**

If implemented, as an outcome of this, all the people of a state can come to know the latest status of any Hospital and the particular details of that Hospital.

---

**Sustainability**

**Financing source**

To implement my innovation, Government funds are necessary to finance the same.

If known, provide information on your finances and organization:

I don't have any organization.

What are the main financial barriers and how do you plan to address them?

To finance the project from the Government level is the main barrier. If I get a prize and renowned for this innovation, Govt. will come to know and probably will finance the Project.

Aside from financial sustainability, how do you plan to grow the initiative?

All the people of a state will be greatly benifited as an outcome of this innovation and thus this initiative will grow.

---

**The Story**

**What was the motivation or defining moment that led to the creation of this innovation? Tell us the story.**

In our Country people are in a dark about the status of the Hospitals and Nursing Homes. That is why people put in trouble while handling a patient. They go door to door of the Hospitals/Nursing Homes and knock them wasting their valuable time, energy and money and getting disappointed ultimately. By the time, patient’s life become more crucial or some of the cases patients loose their lives too. This led me to the creation of this innovation.

**Please provide a personal bio of the social innovator behind this initiative.**
